Also read: Full guide to Call of Duty Season 9 Update Call of Duty: Mobile Since the release of COD Mobile's Season 13 Test Server, most players encountered an unsuccessful Download configuration error. As a result, they were unable to access the test server and flocked to the official COD Mobile Discord server to report. After prioritizing user feedback, game developers finally resolved the issue and released a second version of the test server build to eliminate an unsuccessful configuration download error. The official announcement states: We've got some issues that we want to address with the first build we released over the weekend, and there's also some new content that we want to drop, so we're starting the second version of The Public Test Build today. Please let us know if you are running into any additional issues with: Download configuration failed. Related: COD Mobile Season Test Server Patch Notes: New 3v3 Game Mode, Snowboard Vehicle and more How to fix Download Configuration Failed error in COD Mobile Test Server COD Mobile Download Configuration Failed error To fix this error, nhóm hỗ trợ đã ràt khuyên khich khich second version of COD Mobile Public Test Build. However, if the old version is working perfectly for you, there is no point in switching to the latest version. But if you're faced with a Failed Configuration Download error, you should definitely download and jump on the new build. Here's the download link. In addition, the support team shared some general tips and troubleshooting to download test server builds to avoid any errors. Make sure you're on a secure, uninterrupted connection so that the entire package is downloaded without any problems. Try to turn off or prevent your device from switching to any rest mode. If you're having trouble downloading files, try using a different browser. If you're having trouble installing files, try restarting your device and trying again. Make sure you have 5-6 gigabytes of data for free on your device. That's right. However, if you encounter any more problems, you can always seek support at COD Mobile's official Discord server. Related: COD Mobile: What is the Backstabber Medal and how to earn it? Many COD Mobile players recently faced a problem while starting the game. After downloading the game on the Google Play Store, when players run COD Mobile on their device, the default loading screen appears, but soon after, a pop-up message displayed on the screen says: The download configuration failed. Make sure your device is connected to the network and then restart the game. Although the player is already connected via mobile data or wifi, this message still appears, thus annoying them every time they try to log on to the game. In this article, we discuss and explain the error and show you how to resolve this issue. What is an 'unsuccessful download configuration error' in COD Mobile and how do I resolve it? The error displayed on the screen is actually a network error that does not allow the player to connect to the game's servers, even though the device is already connected via mobile data or over wifi. Well, there are two possible ways to resolve this error in COD Mobile. The first is to use a VPN to connect to the server, and the second is to delete the cache files and restart the game. A VPN connection may not be a legitimate action to take as it spikes in in-game pings. We will build on the second method, which will certainly work on all devices. Published 03/11/2020, 18:58 IST The season 9 update of COD Mobile has dropped today, and players are excited to experiment with new features that have been added. However, many people are facing failed Download configuration errors, which is what will be talked about here. Also read: COD Mobile Season 9 update for Android: What is apk download link Download configuration failure in COD Mobile? An excerpt from COD MobileNga's official subreddit as soon as the update dropped, some players began reporting that they were facing this error. They did so in COD Mobile's official Discord server as well as on the official subreddit. Many also say that despite reinstalling the game, the bug is not fixed. However, not all users of a particular region are facing this error, and the game is working well for most. There is also no reason to panic, as bugs can be attributed to game servers being updated. It is also capable of being resolved automatically within a few hours. Moreover, there are no official words from the developers regarding this error. If any user continues to face this problem, they can contact COD Mobile support via the following channels: #1 Via Twitter: ATVI Assist Twitter: Activision Support Official Player Support Website: Season9 update in COD Mobile Here are some of the key features of the recent update: Map - Shipment 1944Game mode - 10 vs 10Feature - GunsmithGun - Kilo Bolt-actionThe developers have also made a lot of changes to the battle royale mode. They've added four new locations to the vast map that players can access. The latest battles pass until tomorrow, and players will be able to get a new gun and two soldiers from it. In addition, Season 6 of the ratings series begins tomorrow and users will receive a unique set of rewards for climbing the floors. Published August 15, 2020, 18:44 IST Activision releases test server Call of Duty Mobile Season 13 on December 14 which will end on December 16. Meanwhile, a large number of players are experiencing an Unsuccessful Configuration Download error in the COD Mobile Season 13 test server. As a result, players outside the United States cannot access the test server. However, Activision eventually admitted the error and responded to it with a fix. Activision released a new version of the Season 13 test server to fix this problem with the beta server. Activision released the second version of COD Mobile 13 beta, where they fixed the bug. They provided a new link to download the second version, mentioned below, and asked players to report more they face about this. Download and play the second version of COD Mobile Season 13 Test Server The second version of the COD Mobile Season 13 test server is available for download for Android players. The APK file size is about 2 GB and it requires installing about 4 GB of free storage. So if you're facing an unsuccessful Download Configuration error, follow the steps mentioned below to download and install a second version of the beta update: Download the APK file of the second version of COD Mobile Season 13 Beta here. Now, go to File Manager and locate the APK file and install it. Furthermore, grant permission to install apk files by directing to Settings >> full >> confidential >> apps from unknown sources. It will take about 2-3 minutes to complete the installation, depending on the speed of your device. Now, Open the Call of Duty Public Test app and log in with a Guest or Facebook account. Keep in mind that Activision only allows the first 20,000 players to participate in Public Test Server. So make sure you hurry up a bit if you want to save yourself a place in Call of Duty Mobile Season 13 Public Test Server. Additionally, this file and build is independent of the main build. So you don't have to remove or do anything with your main COD mobile app. It will install as another application is done separately. Hope these fixes for cod mobile download configuration errors will be useful for you. Drop your comments in the comments section below.
